  Completed in 2017

About Me

Shubham Gurele is a quick learner who follows current trends in technologies. I am currently focused on mastering the technology used in Python backend development, showcasing his expertise in the Python language.

Projects

1. Driver Drowsiness Detection System :-
- The project aims to develop a CNN-Based Driver Drowsiness Detection System with external factors in corporate to prevent accident.
- In this project my key responsibility is to work on the different different datasets and also support in the coding part.

2. Plant Disease Detector :-
- The project uses a trained ResNet CNN model on an Android camera to detect diseases in plant.
- In this project you can click the image of the plants by the camera and upload on the App, after that it can show the diseases related to that plant.

3. Meter Reader Tracker :-
- The project is a GPS-Enable mobile navigation system with QR CODE integration, using PostgreSQL, on Azure as its database.

4. Universal Converter :-
- The Project is a file format conversion tool with PDF splitting, merging, and encryption features, powered by open-source tools.

INTERNSHIPS

1. TechBeansSolution Pvt Ltd. :-   (Aug 2021-Oct 2021)
- As I am a Team leader and Development Intern, My role was to develop a website and lead to the marketing team.
- The website had been developed by using the HTML, CSS and JavaScript.
- I had also handled the social media platform like Instagram, Facebook and Twitter..

2. TATA Consultancy Services Limited (TCS) :-   (Aug 2022-Sep 2022)
- In this Internship my role was Software Development Intern.
- Our Team had been created a Smart Meter Reader using the QR Scanner.

Achievements

- SAILFISH-I: A Lightweight Block Cipher for Cloud-Enabled Fog Devices (Published)
- IEEE Student Branch Treasurer – Membership No. 98505932
